EE 477 PROJECT 2

Write a brief report on the cybersecurity threats against healthcare facilities, medical data centers, electronic health records infrastructure or medical devices. The report should discuss the following:

- Nature of such threats and their perpetrators
- Example real cyber-attack incidents
- Technical analysis of weak elements in cybersecurity defense exploited in such attacks
- Recommended defensive measures that should be taken to minimize the risk of such attacks
- Recommended measures to allow fast recovery from a cyber-attack

Please make sure to list all references used in preparing this report.
